

Problem Statement

Java

Given the cost price CP and selling price SP. Write a java program to calculate profit or loss

Hint: For profit the selling price should be more than cost price

Constraints :

$$1 \leq CP \leq 10^6$$

$$1 \leq SP \leq 10^6$$

Input Format :

First line of the input contains CP and SP separated by ','

Output Format :

Profit/Loss

Sample Input : 63,50

Sample Output : Loss

Sample Input : 63,65

Sample Output : Profit
